Education

Minnesota State University, Mankato — Mankato, MN
Bachelor of Science in Computer Information and Technology; Minor in Mathematics — *Expected: May 2026*
Certificate in Database Technologies
Certificate in Software Development

Minnesota State University, Mankato — Mankato, MN
Master of Science in Data Science — *Expected: May 2027*

Accomplishments:

Dean's List: Spring 2022, Fall 2023 (Top 10% of class)

Member, Alpha Lambda Delta Honor Society for Academic Excellence Recipient, Minne Analytics and Federated Insurance Scholarships for IT

Experience

Full-Stack Software Engineer — Aug 2023 – Present
Rizzy Pokémon Shop (E-Commerce Platform)

- Developed a full-stack e-commerce platform using JavaScript, Node.js, Express, PostgreSQL, HTML, and CSS, supporting product browsing, cart management, and checkout for 15+ products
- Designed and implemented 10+ RESTful APIs for product, user, and order management, including endpoints for authentication, cart persistence, and order processing
- Integrated Stripe API and tested 100+ payment scenarios (success, failure, cancellation), achieving consistent and reliable transaction handling
- Built a persistent shopping cart system with real-time price updates, tested across multiple user sessions and edge cases
- Refactored backend into modular components (routes, controllers, services), reducing debugging time by 30% during feature updates

Data Science / Machine Learning Research Experience — Oct 2023 – Present
Minnesota State University, Mankato

- Developed a credit risk prediction model using Python and Scikit-learn on 20,000+ loan records
- Engineered features such as income ratio, credit utilization, and loan history to improve model input quality
- Applied preprocessing techniques including scaling and stratified train/test splitting to ensure reliable evaluation
- Trained Logistic Regression and Random Forest models, comparing performance using precision, recall, and F1-score
- Improved detection of high-risk borrowers by prioritizing recall, reducing false-negative predictions in test results

Overnight Stocker Associate — May 2023 – Dec 2025
Walmart

- Managed inventory restocking and organization across 15+ aisles per shift while ensuring workflow efficiency
- Collaborated with a team of 10+ associates to meet restocking goals ahead of schedule by 20% weekly.
- Applied process optimization techniques reducing product retrieval time by 15%

Projects

Retail Sales Dashboard — Data Analytics Project | *Power BI, Excel*
Jan 2026

- Cleaned and transformed 9,900+ sales records in Excel by removing duplicates, validating fields, and standardizing formats
- Built a two-page Power BI dashboard with KPIs, filters, and drill-down features to analyze regional and category performance
- Enabled real-time data exploration through interactive visuals, improving visibility into sales trends and shipping performance
- Designed dashboard for executive-level reporting with summary and detailed views

Leap of Ages | *Unity, C#, Game Development* — Oct 2022

- Developed a 2D platformer with progressive level difficulty, incorporating enemy AI and dynamic physics simulation.
- Optimized frame rendering, improving performance by **25 FPS** across test environments.
- Presented at CADSCOM 2022 Project Showcase; recognized for innovative level design and gameplay flow.

Technical Skills

Programming Languages: Python, C#, C++, JavaScript, HTML/CSS, SQL

Frameworks and Tools: Node.js, Express.js, .NET, Flask, Git, GitHub, Visual Studio, VS Code, Jupyter Notebook, Excel, Microsoft Office, Unity

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, Scrapy, ipykernel

Databases: SQL Server, PostgreSQL, MySQL

Skills: Data Cleaning, Data Visualization, Dashboard Design, Data Modeling, Exploratory Data Analysis (EDA)
